Introduction to DepEd Copilot C.H.A.T. Initiative

Instruction, Submission, and Rubric

Flight Mission 1: Foundations of Copilot Chat and Responsible AI Use

Activity: Writing a Safe and Effective Instructional Prompt Using Copilot Chat

Instructions:

Create one instructional prompt for Copilot Chat that is intentionally designed for classroom use. The prompt must be:

- *Safe and appropriate for an educational context*
- *Clear, specific, and efficient, capable of producing a strong instructional output*
- *Structured using the CORE framework (Context, Objective, References, Expectations)*
- *Ethically and privacy-aligned, particularly for child-facing or classroom-related use*

After writing your prompt, prepare a short-written justification explaining why your prompt demonstrates:

- *Ethical and responsible AI use*
- *Protection of learner privacy and data*
- *Child-safe and age-appropriate design choices*

Your justification should clearly connect these principles to specific elements of your prompt.

Submission Requirements:

Please submit all three (3) components listed below:

1. CORE Prompt (Submit the full prompt exactly as written and entered into Copilot.)

- *One safe and effective instructional prompt created using Copilot.*
- *The prompt must explicitly follow the CORE framework:*
  - *Context*
  - *Objective*
  - *References*
  - *Expectations*

2. Copilot Output (in a Word docx file)

- *The AI-generated output produced by Copilot in response to your instructional prompt.*

3. Short Written Justification

- *A short justification (one short paragraph or 3–5 sentences) explaining:*
  - *How your prompt demonstrates ethical, privacy-aligned, and child-safe prompting*
  - *How your design choices support responsible and appropriate AI use in an educational setting*

Rubric: Writing a Safe and Effective Instructional Prompt Using Copilot Chat

Criteria	Exemplary (4)	Proficient (3)	Developing (2)	Beginning (1)
1. Use of the CORE Framework (Context,	The prompt clearly and explicitly includes all four	The prompt includes all CORE components, but	The prompt includes some CORE elements,	The prompt does not follow the CORE framework.

Objective, References, Expectations)	CORE components**.** Each component is specific, well-developed, and easy to identify. References are described appropriately (e.g., existing lesson materials), and the prompt is reusable and instructional in nature.	one component may lack detail or clarity. References are present but general. The structure supports an instructional response.	but one or more components are missing, vague, or unclear, limiting the effectiveness of the AI response.	Multiple components are missing or unclear, resulting in an unfocused or ineffective prompt.
2. Effectiveness and Clarity of the Instructional Prompt	The prompt is clear, specific, and efficient, using precise instructions that guide Copilot effectively. Expectations for tone, format, instructional level, and purpose are explicit and demonstrate strong prompt-engineering practices appropriate for classroom use.	The prompt is generally clear and instructional. Some expectations could be more explicit, but Copilot can generate a relevant and usable response.	The prompt includes vague or incomplete instructions. The AI response may only partially meet the intended instructional goal.	The prompt lacks clarity and structure, leading to a response that does not align with the intended instructional purpose.
3. Ethical, Privacy-Aligned, and Child-Safe Prompting (Justification)	The justification clearly explains how the prompt demonstrates ethical AI use**,** privacy protection**,** and child-safe design**.** Specific decisions (e.g., avoiding personal data, using age-appropriate language, defining AI's role and limits) are explicitly identified and well explained.	The justification addresses ethical, privacy-aligned, and child-safe considerations, but explanations may be general or lack specific references to the prompt.	The justification mentions ethics or safety but provides a limited explanation or weak connections to the actual prompt design.	The justification is missing, unclear, or does not demonstrate understanding of ethical, privacy-aligned, or child-safe AI prompting.

Flight Mission 2: Admin and Compliance

Activity: Class Record Analysis, Narrative Report and Presentation with Copilot Chat

Instructions:

Upload your own Excel class records to Copilot Chat and write a CORE-structured prompt instructing Copilot to analyze the data and determine the overall performance of the class.

Using the uploaded class record, ask Copilot to generate:

- *A narrative student performance report that summarizes overall class performance based on grades, assessments, and attendance trends*
- *A presentation-ready summary of the same information, highlighting key performance trends, strengths, and areas for improvement*

After generating the outputs, review them using your professional judgment to ensure accuracy, appropriateness, and relevance to your class context.

Finally, reflect on how Copilot supported your workflow and efficiency, particularly in analyzing class data, summarizing performance trends, and preparing administrative reports.

Submission Requirements:

Please submit all three (3) components listed below:

1. CORE Prompt (Submit the full prompt exactly as written and entered into Copilot.)

- *The full instructional prompt you wrote and used in Copilot for class record analysis.*
- *The prompt must clearly follow the CORE framework*
  - *Context*
  - *Objective*
  - *References*
  - *Expectations*

2. Copilot Output (Narrative Report (Word docx file) and Presentation (PowerPoint file))

- *The AI-generated output produced by Copilot in response to your instructional prompt.*

  Including:

  Narrative Report (Word docx file)
  - *A short narrative student performance report generated using Copilot*
  - *Based on the analysis of your uploaded Excel class records*

  Presentation File (PowerPoint file)
  - *A presentation created with Copilot, summarizing student performance, strengths, and areas for improvement*

3. Short Reflection

- *One short paragraph or 3–5 sentences explaining:*
  - *How Copilot improved efficiency, organization, or time management*
  - *What kind administrative tasks were simplified or streamlined through AI use*

Rubric: Class Record Analysis, Narrative Report and Presentation with Copilot Chat

Criteria	Exemplary (4)	Proficient (3)	Developing (2)	Beginning (1)

1. Use of the CORE Framework in the Prompt	The submitted prompt clearly and explicitly includes all four CORE components (Context, Objective, References, Expectations). Each component is well developed and specific, clearly instructing Copilot to analyze the uploaded Excel class records and produce both a narrative report and a presentation.	The prompt includes all CORE components, but one component lacks specificity or clarity. Copilot can still generate the required outputs, but guidance could be more precise.	The prompt includes some CORE elements, but one or more components are missing, vague, or unclear, limiting Copilot's ability to generate appropriate outputs.	The prompt does not follow the CORE framework. Multiple components are missing or unclear, resulting in an unfocused or ineffective prompt.
2. Effectiveness and Clarity of the Instructional Prompt	The prompt is clear, specific, and efficient, with well-defined instructions regarding tone, content focus, and output formats (Word and PowerPoint). The prompt demonstrates strong prompt-design skills for administrative and professional use.	The prompt is generally clear and instructional, but some expectations (e.g., tone, focus areas, or formats) could be more explicit.	The prompt contains vague or incomplete instructions. Copilot's outputs only partially meet the intended administrative purpose.	The prompt lacks clarity and structure, resulting in outputs that do not align with the intended task.
3. Reflection on Copilot Use and Efficiency	The reflection clearly explains how Copilot improved efficiency, organization, or time management**.** Specific administrative tasks (e.g., drafting, summarizing, reformatting for presentation) are clearly identified and thoughtfully explained.	The reflection explains how Copilot supported efficiency, but examples or explanations may be general.	The reflection briefly mentions efficiency gains but provides limited explanation or weak connections to actual use of Copilot.	The reflection is missing, unclear, or does not explain how Copilot improved efficiency or workflow.

Flight Mission 3: Lesson Planning and Instruction

Activity: Developing a DepEd Curriculum Aligned Lesson Plan with Copilot Chat

Instructions:

Create a DepEd curriculum-aligned lesson plan using Copilot Chat, then refine the AI-generated output using your professional judgment. The lesson plan must be aligned with the MATATAG Curriculum appropriate to your subject area and grade level.

To support accurate alignment and structure, you must attach and reference the following files in Copilot Chat:

- *The MATATAG Curriculum document relevant to your subject and grade level*
- *Your school-approved lesson plan format (or an official DepEd lesson plan template)*
- *(If available) A classroom observation tool (COT) to guide instructional quality and alignment*

After, refine the output to ensure accuracy, instructional soundness, and contextual appropriateness. And reflect on how Copilot Chat supported effective lesson planning.

Submission Requirements:

Please submit all three (3) components listed below:

1. CORE Prompt (Submit the full prompt exactly as written and entered into Copilot.)

- *The full instructional prompt you wrote and used in Copilot for creating lesson plan aligned with DepEd Curriculum.*
- *The prompt must clearly follow the CORE framework:*
  - *Context*
  - *Objective*
  - *References*
  - *Expectations*

2. Copilot Output (Lesson Plan in a Word docx file)

- *A lesson plan created with Copilot Chat aligned with the DepEd Curriculum*

3. Short Reflection

- *One short paragraph or 3–5 sentences explaining:*
  - *How you refined or adjusted the AI-generated lesson plan*
  - *How Copilot Chat can support teachers in efficient and effective lesson planning while maintaining professional judgment*

Rubric: Developing a DepEd Curriculum Aligned Lesson Plan with Copilot Chat

Criteria	Exemplary (4)	Proficient (3)	Developing (2)	Beginning (1)
1. Use of the CORE Framework in the Prompt	The submitted prompt clearly and explicitly includes all four CORE components	The prompt includes all CORE components, but one element lacks specificity or	The prompt includes some CORE elements, but one or more components are	The prompt does not follow the CORE framework. Multiple components are

	(Context, Objective, References, Expectations). The prompt provides precise guidance for generating a lesson plan aligned with the DepEd curriculum**,** including subject, grade level, and required lesson components.	detail. Copilot can still generate a relevant lesson plan, though guidance could be clearer.	missing or unclear, limiting curriculum alignment or instructional coherence.	missing or unclear, resulting in an unfocused or inappropriate lesson plan.
2. Quality and Clarity of the Instructional Prompt	The prompt is clear, specific, and well-structured**,** with explicit expectations for lesson objectives, activities, assessment, and alignment to DepEd standards. The prompt demonstrates strong lesson-planning and AI-prompting skills.	The prompt is generally clear and instructional but could benefit from more explicit guidance on lesson structure or curriculum alignment.	The prompt contains vague or incomplete instructions, resulting in a lesson plan that is only partially aligned or instructional.	The prompt lacks clarity and structure, leading to a lesson plan that does not meet instructional or curriculum requirements.
3. Reflection on Refining AI Output and Lesson Planning Support	The reflection clearly explains how the teacher refined or improved the AI-generated lesson plan and thoughtfully describes how Copilot supports efficient, effective lesson planning while maintaining professional judgment.	The reflection explains how Copilot supported lesson planning, but descriptions of refinement or professional decision-making may be general.	The reflection briefly mentions Copilot's use but provides limited explanation of refinement or instructional benefit.	The reflection is missing, unclear, or does not demonstrate understanding of how Copilot supports lesson planning.

Flight Mission 4: Visual Aids, Assessment, Quizzes, and Rubrics

Activity: Creating an Instructional Learning Material (Visual Aid) or Assessment (Quiz or Test Exam or Rubric) with Copilot Chat

Instructions:

Create one instructional learning material (visual aid) or assessment material (quiz or test exam or rubric) using Copilot Chat, then validate the AI-generated output to ensure it meets standards for accuracy, appropriateness, and curriculum alignment.

You may choose one of the following formats:

- *An infographic, banner, story, image, poster or other visual learning aid*
- *A quiz or short assessment*
- *An exam or assessment item set*

Using a CORE-structured prompt, instruct Copilot to develop the selected resource or assessment based on your subject area, grade level, and curriculum standards.

After generating the output:

- *Carefully review the content for factual accuracy*
- *Check that it is age-appropriate and instructionally sound for your learners*
- *Confirm alignment with the DepEd/MATATAG curriculum or relevant learning competencies*

Finally, validate the material by explaining how it meets these quality criteria and is ready for responsible classroom use.

Submission Requirements:

Please submit all three (3) components listed below:

1. CORE Prompt (Submit the full prompt exactly as written and entered into Copilot.)

- *The full instructional prompt you wrote and used in Copilot for creating a learning resource or assessment material.*
- *The prompt must clearly follow the CORE framework:*
  - *Context*
  - *Objective*
  - *References*
  - *Expectations*

2. Copilot Output (Image file for visual aids or Word docx file for assessment)

- *An instructional learning material (visual aid) or assessment material (quiz or test exam) with Copilot.*
- *The output should be ready for classroom or instructional use, subject to teacher validation*

3. Short Validation

- *A short validation (one short paragraph or 3–5 sentences) explaining:*
  - *How you confirmed the accuracy of the content*
  - *Why the learning resource or assessment material is appropriate for the target learners*
  - *How the learning resource or assessment is aligned with curriculum standards or learning objectives*

Rubric: Creating an Instructional Learning Material (Visual Aid) or Assessment (Quiz or Test Exam or Rubric) with Copilot Chat

Criteria	Exemplary (4)	Proficient (3)	Developing (2)	Beginning (1)
1. Use of the CORE Framework in the Prompt	The submitted prompt clearly and explicitly includes all four CORE components (Context, Objective, References, Expectations). Each component is specific and well-developed, clearly guiding Copilot to generate an appropriate learning resource or assessment aligned with curriculum standards.	The prompt includes all CORE components, but one component lacks detail or clarity. Copilot can generate the required material, though guidance could be more precise.	The prompt includes some CORE elements, but one or more components are missing, vague, or unclear, limiting the effectiveness of the AI-generated output.	The prompt does not follow the CORE framework. Multiple components are missing or unclear, resulting in an unfocused or inappropriate output.
2. Effectiveness and Clarity of the Instructional Prompt	The prompt is clear, specific, and well structured**,** with explicit expectations for content type, format (visual aid or assessment), difficulty level, and instructional purpose. The prompt demonstrates strong instructional design and AI-prompting skills.	The prompt is generally clear and instructional, but some expectations (e.g., format, scope, or difficulty) could be more explicit.	The prompt contains vague or incomplete instructions, resulting in an output that only partially meets instructional or assessment goals.	The prompt lacks clarity and structure, leading to an output that does not meet the intended instructional purpose.
3. Validation of Accuracy, Appropriateness, and Curriculum Alignment	The validation clearly explains how the teacher confirmed accuracy**,** ensured learner appropriateness**,** and verified alignment with curriculum standards**.** Specific	The validation addresses accuracy, appropriateness, and alignment, but explanations may be general or lack specific examples.	The validation mentions one or two validation aspects but provides limited explanation or weak connections to the output.	The validation is missing, unclear, or does not demonstrate understanding of how to evaluate AI-generated instructional materials.

	criteria or review strategies are clearly described.			

Flight Mission 5: Professional Growth

Activity: Developing a Professional Growth Plan Using Copilot
Instructions: *Create a professional growth plan using Copilot Chat, then reflect on how Copilot supports the exploration of professional growth pathways and the organization of professional goals.* *To ground the plan in your actual professional context, you must attach at least one relevant reference file in Copilot Chat. This may include, but is not limited to:* • *A career development or professional growth plan template* • *A performance evaluation or feedback summary* • *A professional standards or competency framework* • *A school or division professional development plan* • *A self-assessment or career roadmap document* *Using these reference files, write a CORE-structured prompt instructing Copilot to generate a professional growth plan that includes clear goals, strategies or actions, timelines, and indicators of success. Then, refine and ensure the plan is realistic, relevant, and aligned with your role and career goals.* *Finally, reflect on how Copilot Chat assisted you in:* • *Exploring possible professional growth pathways* • *Organizing and structuring your professional goals* • *Improving efficiency while maintaining ownership over career decisions*

Submission Requirements:
Please submit all three (3) components listed below:
 	
1. CORE Prompt (Submit the full prompt exactly as written and entered into Copilot.)
• *The full instructional prompt you wrote and used in Copilot for creating a professional growth plan.*
• *The prompt must clearly follow the CORE framework:*
  ○ *Context*
  ○ *Objective*
  ○ *References*
  ○ *Expectations*
2. Copilot Output (Professional Growth Plan in a Word docx file)
• *A **professional growth plan generated using Copilot Chat***
• *The plan should include clearly defined components such as goals, actions or strategies, timelines, and success indicators*
• *The plan should be appropriate to your role and professional context*
 	
3. Short Validation
• *A short explanation (one short paragraph or 3–5 sentences) describing:*
  ○ *How Copilot Chat assisted you in exploring professional growth pathways*
  ○ *How Copilot helped organize, structure, or clarify your professional growth plan*
  ○ *Why the learning resource or assessment material is appropriate for the target learners*
  ○ *How the learning resource or assessment is aligned with curriculum standards or learning objectives*

Rubric: Developing a Professional Growth Plan Using Copilot				
Criteria	**Exemplary (4)**	**Proficient (3)**	**Developing (2)**	**Beginning (1)**
1. Use of the CORE Framework in the Prompt	The submitted prompt clearly and explicitly includes all four CORE components (Context, Objective, References, Expectations). The prompt provides clear guidance for generating a professional growth plan tailored to the teacher's role and career goals.	The prompt includes all CORE components, but one element lacks clarity or specificity. Copilot can still generate a relevant growth plan, though guidance could be refined.	The prompt includes some CORE elements, but one or more components are missing, vague, or unclear, limiting the relevance or usefulness of the growth plan.	The prompt does not follow the CORE framework. Multiple components are missing or unclear, resulting in an unfocused or inappropriate plan.
2. Use of Attached Reference Files	The teacher appropriately attaches and clearly references relevant career-related file(s) (e.g., career plan template, professional standards, performance feedback). The prompt effectively directs Copilot to use these files in shaping the growth plan.	Relevant reference file(s) are attached and referenced, but instructions for how Copilot should use them are general or partially unclear.	Reference file(s) are attached but weakly referenced or not clearly integrated into the prompt.	No relevant reference file is attached, or the file is not referenced in the prompt.
3. Reflection on Copilot's Support for Growth and Organization	The explanation clearly describes how Copilot supported exploration of career pathways and organization of professional goals**.** Specific examples of how Copilot improved efficiency, clarity, or planning	The explanation addresses how Copilot supported growth planning and organization, but examples or connections may be general.	The explanation briefly mentions Copilot's assistance but provides limited insight into its impact on planning or organization.	The explanation is missing, unclear, or does not demonstrate understanding of how Copilot supports professional growth planning.

	are clearly explained.			

Sample Prompt for Testing

Good Prompt:

*Analyze this class record **Grade 8 - Amihan TLE Class Record.xlsx** and generate visual data representations, including a bar graph, pie chart, and line graph, that clearly show student performance trends.*

Using the insights from the analysis, create a formal Microsoft Word (.docx) file output containing a 150–200-word Narrative Report summarizing overall class performance, key strengths, areas for improvement, learning gaps, contributing factors, and major data-driven trends.

Format the document that follows DepEd Format with a title section, headings, subheadings, paragraph-style narrative, clear professional tone, data-supported explanations, and actionable improvement strategies.
